**EP<sub>4</sub> Receptor Antagonist for  
Chronic Inflammatory Pain**  
**Worldwide Partnering Opportunity**

# 1. Executive Summary

- EP4 antagonist: RQ-00000007
  - Orally-active and first-in-class for chronic inflammatory pain
  - Effective for treating osteoarthritis (OA) pain in Phase 2 study
  - Comparable efficacy to NSAIDs
  - Favorable safety profile than NSAIDs
  - Potential “blockbuster drug” in the market of pain
- Partnering opportunity for development, manufacturing, and commercial rights
- Several backup compounds available

## 2. Table of Contents

| Title  | Slide No. |
|--|-----------|
| 1. Executive Summary                                       | 2         |
| 2. Table of Contents                                       | 3         |
| 3. Product Concept   | 4         |
| 4. Medical Needs   | 5         |
| 5. Market Opportunity                                      | 6         |
| 6. EP4 Antagonist: Improved Potential for Treating Pain    | 7         |
| 7. Potential for Improved Safety Profile vs. NSAIDs/COXIBs | 8         |
| 8. Compound Attributes                                     | 9         |
| 8.1. Compound Information                                  | 10        |
| 8.2. Non-Clinical Pharmacology                             | 11~15     |
| 8.3. Non-Clinical Pharmacokinetics                         | 16        |
| 8.4. Non-Clinical Pharmacokinetic Studies                  | 17        |
| 8.5. Non-Clinical Safety                                   | 18        |
| 8.6. Non-Clinical Safety Studies                           | 19, 20    |
| 8.7. Clinical Studies                                      | 21        |
| 8.8. Phase 1 Profile of RQ-00000007                        | 22, 23    |
| 8.9. Phase 2 Profile of RQ-00000007                        | 24        |
| 8.10. Clinical Studies Summary                             | 25        |
| 9. Competitors in EP4 Antagonist Field                     | 26        |
| 10. References   | 27        |
| 10.1. Publication List of RQ-00000007                      | 28        |
| 10.2. Other Publications                                   | 29        |
