## 1. Qualitative information regarding settlement of accounts for the first three months

### (1) Qualitative information regarding consolidated operating results

#### 1) Financial results

During the first three months ended March 31, 2017, the Japanese economy was on a moderate recovery track with export-oriented companies reviving, in particular, against the backdrop of the global economic recovery. Meanwhile, the outlook for the Japanese economy remained uncertain amid a sense of caution about the economic policies of U.S. President Donald Trump, who won the 58<sup>th</sup> U.S. presidential election conducted on November 8, 2016, coupled with political turmoil in Europe and concerns over potential deceleration of the Chinese and other emerging economies.

In the country's pharmaceutical sector, domestic pharmaceutical companies actively sought to buy or sell mainly long-listed drug products or businesses, pursuing business restructuring, with a focus on products whose patents had expired. The movement toward becoming specialty pharmaceutical companies specializing in the fields of specific disease has a non-negligible effect on the licensing-out activities of drug discovery venture companies such as the Company.

Against this backdrop, the Company pushed ahead with research and development and sales activities, aiming to continuously generate compounds developed as pharmaceuticals, to expand its research and development portfolio, and to license out developed compounds.

As for the status of clinical trials at our licensees, Aratana Therapeutics Inc. (U.S.) ("Aratana (U.S.)") started, in January 2017, to sell Galliprant®, a pain management compound for dog osteoarthritis, together with Elanco Animal Health, an animal pharmaceutical division of Eli Lilly and Company.

On February 3, 2017, the Company made TMRC a wholly owned subsidiary company by share exchange. TMRC is a bio venture specializing in the fields of cancer and rare disease, and is mainly engaged in TM-411 (generic name: Tamibarotene) in-licensed from Toko Pharmaceutical Industries Co., Ltd. and out-licensing it to Syros Pharmaceuticals, Inc. (headquarters: Massachusetts, U.S.). Through making TMRC a subsidiary, the Company is able to use TMRC's know-how on research and development, and licencing activities relating to new treatment drugs in the fields of cancer and rare disease, the Company will aim to expand its business domains by conducting research and development and licensing activities based on new mechanisms of action created in academia.

Accordingly, financial results for the first three months, the reporting period, were as follows. Business revenue for the period was 417 million yen, operating loss totaled 59 million yen, ordinary loss totaled 74 million yen and loss attributable to owners of parent was 65 million yen. Total business expenses were 476 million yen, of which 113 million yen in royalty payments was recorded under cost of business revenue. Moreover, research and development expenses were 197 million yen and other selling, general and administrative expenses totaled 165 million yen. In the first three months, interest on securities of 13 million yen, foreign exchange losses of 27 million yen, gain on sales of investment securities of 5 million yen, and gain on bargain purchase of 3 million yen were recognized.

#### 2) Research and development activities

Research and development expenses of the Company during the first three months were 197 million yen. The main components of these activities were as follows:

##### i. RaQualia's research and development and collaborative research

###### Exploratory and discovery phase

The Company discovered two promising candidate compounds suitable for external medical preparations and began conducting exploratory toxicity studies in a project to evaluate a selective sodium channel blocker compound for indications such as inflammatory pain and neuropathic pain. In addition, the Company explored new lead compounds used for oral medications and discovered several candidate compounds.

The Company continued collaborative research with four companies.

Company	Start date	Content
EA Pharma Co., Ltd.	October 2012	Collaboration on a specific ion channel target for gastrointestinal treatments
Interprotein Corporation	February 2013	Collaboration on a specific protein-protein interaction (PPI) inhibitor for pain treatments
XuanZhu Pharma Co., Ltd.	December 2015	Collaboration on a specific ion channel target for pain treatments
Asahi Kasei Pharma Corporation	January 2016	Collaboration on a specific ion channel target for pain treatments

#### Preclinical development phase

**(a) Ghrelin receptor agonist (RQ-00433412)**

The compound is under development for cancer-related anorexia/cachexia syndrome. The Company has completed investigation of preclinical efficacy and has not detected any inadequacy for moving on to the next stage of performing preclinical development study.

**(b) TRPM8 blocker compounds (RQ-00434739)**

The compound is under development for neuropathic pain (chemotherapy-induced cold allodynia). The Company has completed investigation of preclinical efficacy and has not detected any inadequacy for moving on to the next stage of performing preclinical development study.

**(c) Motilin receptor agonist (RQ-00201894)**

The compound is under development for gastroparesis, functional dyspepsia and post-operative Ileus. The Company has completed the preclinical studies, including in vivo pharmacology studies, metabolism and pharmacokinetics studies, toxicity studies (GLP) and safety pharmacology studies (GLP), which were the prerequisite studies for Phase I clinical trials. So far, the Company has not detected any inadequacy for moving on to the next clinical development stage.

#### Clinical development phase

**(a) 5-HT<sub>4</sub> partial agonist (RQ-00000010)**

The compound is under development for gastroparesis, functional dyspepsia and chronic constipation. In August 2016, Virginia Commonwealth University, Parkinson's and Movement Disorders Center ("VCU") of the United States, a research partner of the Company, launched investigator-initiated clinical trials of the compound. These trials, while obtaining a research grant from The Michael J. Fox Foundation for Parkinson's Research, are currently under way as a clinical research program aimed to examine the safety and efficacy of the compound for managing gastroparesis, a complication of Parkinson's disease patients.

**(b) Potassium-competitive acid blocker (RQ-00000004, tegoprazan)**

The compound is under development for gastro-esophageal reflux disease (RE/NERD), and the Company completed the Phase I clinical trials in Japan, following those in the U.S. Utilizing data on clinical trials in South Korea where development has been underway, we will continue consultations toward licensing out the compound.

**(c) 5-HT<sub>2B</sub> antagonist (RQ-00310941)**

For the compound, which is under development for irritable bowel syndrome with diarrhea (IBS-D), the Company launched the Phase I clinical trials for the first administration of the compound to human (involving healthy adults and patients) in July 2015 in U.K., which is currently ongoing.

**(d) Anti-MRSA antibacterial agent (dalbavancin)**

The Company is continuing activities for the licensing-out of this agent in Japan.

#### ii. Status of development at licensee corporation

**(a) Potassium-competitive acid blocker (RQ-00000004, tegoprazan)**

The compound is under development primarily for gastro-esophageal reflux disease (RE/NERD) by CJ Healthcare Corporation (headquarters: South Korea), and is undergoing Phase III clinical trials in South Korea. In addition, preparations are under way to start its development in China.

**(b) Serotonin 5-HT<sub>2A</sub> and dopamine D<sub>2</sub> receptor blocker (ziprasidone)**

The compound is under development for schizophrenia by Meiji Seika Pharma Co., Ltd., and is undergoing Phase III clinical trials in Japan. The agent has already been marketed in 83 countries by Pfizer Inc. in the U.S., and is listed as a first-line drug in the U.S. Treatment Guidelines.

**(c) EP4 antagonist (Galliprant<sup>®</sup>, RQ-00000007, AT-001, grapiprant, animal drug)**

The compound was developed for pain management for pets by Aratana (U.S.). In January 2017, the Company started selling it in the U.S. through Aratana (U.S.) and Elanco Animal Health (headquarters: U.S.; an animal

pharmaceutical division of Eli Lilly and Company). In Europe, the compound is now under application with the European Medicines Agency (EMA) for approval for sales with approval is expected to be obtained in 2017.

**(d) Ghrelin receptor agonist (Entyce<sup>®</sup>, RQ-0000005, AT-002, capromorelin, animal drug)**

The compound was developed for anorexia management for pets by Aratana (U.S.). Following favorable results of clinical trials with dogs, Aratana (U.S.) has obtained manufacturing and marketing approval with the FDA. Preparations are underway for the commencement of sales in the latter half of 2017.

While continuing the program to develop the compound as a cat anorexia management drug, Aratana (U.S.) launched long-term toxicity studies on cats in December 2016.

**(e) EP4 antagonist (RQ-0000007, AAT-007, grapiprant)**

Preparations are currently underway at a licensee of AskAt, Inc. (Japan) which is our licensee for implementing clinical trials.

**(f) cyclooxygenase-2 (COX-2) inhibitor (RQ-00317076, AAT-076)**

Preparations are currently underway at a licensee of AskAt, Inc. (Japan) which is our licensee for implementing clinical trials.

No items to report.

##### Notes on significant changes in the amount of shareholders' equity

During the first quarter ended March 31, 2017, the Company made TMRC a wholly owned subsidiary company by share exchange on February 3, 2017. In conjunction with this, as of March 31, 2017, capital surplus increased by 189,783 thousand yen.

##### Additional information

###### *Significant changes in the scope of consolidations*

During the first quarter ended March 31, 2017, the Company made TMRC a wholly owned subsidiary company by share exchange on February 3, 2017. In conjunction with this, TMRC is included in the scope of consolidation from the first quarter ended March 31, 2017.

###### *Significant matters forming the basis of preparing the quarterly consolidated financial statements*

1. Scope of consolidation
  - Number of consolidated subsidiaries: 1
  - Name of consolidated subsidiary: TMRC Co., Ltd.
2. Balance sheet date of consolidated subsidiary

The balance sheet date of the consolidated subsidiary is the same as the consolidated balance sheet date.
3. Accounting policies
  - (1) Valuation bases and methods of significant assets
    - 1) Securities
      - i) Held-to-maturity securities  
Stated at amortized cost (straight-line method).
      - ii) Available-for-sale securities  
*Securities with readily determinable fair value*  
Stated at fair value based on the market price as of the consolidated balance sheet date (valuation differences are recognized in net assets and the cost of sales is calculated by the moving-average method).  
Note however that available-for-sale securities denominated in foreign currencies are translated into Japanese yen using the spot exchange rate as of the consolidated balance sheet date and the translation differences are treated as valuation difference. Valuation differences are recognized in net assets.
    - 2) Derivatives  
Stated at fair value.
    - 3) Inventories  
*Supplies*  
Stated at cost using the last purchase cost method (balance sheet amounts are determined based on the method of writing down book value in accordance with decreased profitability of assets).
  - (2) Depreciation and amortization of significant depreciable and amortizable assets
    - 1) Property, plant and equipment  
Depreciated by the declining balance method.  
Note however that facilities attached to buildings acquired on and after April 1, 2016, and buildings are depreciated by the straight-line method.  
The main useful lives are as follows:

Facilities attached to buildings	8 to 15 years
Tools, furniture and fixtures	4 to 6 years
    - 2) Intangible assets  
Amortized by the straight-line method.  
Software for internal use is amortized by the straight-line method over the internally estimated useful life (5 years).
    - 3) Long-term prepaid expenses  
Amortized by the straight-line method.
  - (3) Criteria for translating assets or liabilities denominated in foreign currencies into Japanese currency  
Monetary claims and liabilities denominated in foreign currencies are translated into Japanese yen using the spot exchange rate as of the consolidated balance sheet date, and translation differences are included in gains or losses.
  - (4) Scope of cash and cash equivalents in consolidated statements of cash flows  
Cash and cash equivalents consist of cash on hand, demand deposits, and short-term investments that are readily convertible to known amounts of cash and subject to insignificant risk of change in value and due within three months from the date of acquisition.
  - (5) Other significant matters for preparing the consolidated financial statements  
*Accounting for consumption taxes*  
Consumption taxes and local consumption taxes are accounted for based on the tax exclusion method.

###### *Application of Implementation Guidance on Recoverability of Deferred Tax Assets*

Effective from the first quarter ended March 31, 2017, the Company has applied "Implementation Guidance on Recoverability of Deferred Tax Assets" (ASBJ Guidance No. 26, March 28, 2016).
